

DaVinci Technologies offers a complete line of **Printer Maintenance and Cleaning Supplies**. Printers and especially print heads are extremely sensitive to contaminants such as dust, dirt, ink residues, etc. Proper large format printer maintenance is critical to ensure production deadlines are met, exceptional quality prints, and extended printer life.

Below are the most commonly used cleaning supplies found in the printing industry, however, we can supply virtually any item from mops and aprons to gloves and wipes.

DaVinci Technologies Cleaning & Printer Maintenance Supplies

Print Head Wipes

Polyester knit, lint-free print head wipes are designed for cleaning print heads and other sensitive areas involved with the printing industry. To insure the highest quality, these wipes are cleanroom laundered. They are extremely absorbent, durable, and abrasion resistant to rough surfaces and burs. Available in various sizes, quantities and weights.

Print Head Swabs

Using Print Head Swabs will help improve the quality of your prints and extend the life of your print heads. These foam-tipped swabs can be used for cleaning print heads and other hard to reach printer components. The tips are thermally welded to the shaft to ensure durability. Available in flexi-foam tip or mitt shaped tip.

Gloves

Wear gloves to avoid direct contact with ink and cleaning solvents. Vinyl, Nitrile, Latex, Cotton, whatever gloves you prefer - DaVinci can supply!

Cleaning Solutions

DaVinci offers Capping & Wiping fluid for HP 9,000 & 10,000 as well as Roland Cleaning Fluid in bulk to save you money over time.

Industrial Wipes

DaVinci's industrial wipes are perfect for everyday use in production. They are durable enough to handle a variety of surfaces yet soft enough to be used on face and hands. They have a soft outer layer with a highly absorbent inner layer making them suitable for grease and grime as well as inks and other liquids.
